

J&L 560 LITE

Pneumatic California Doubles

A **HEIL** International LLC Company

CONFIGURATIONS

- Semi & Pull Trailers
- 560 Cu. Ft.

*Larger capacity trailers also available

PREMIER QUALITY

- Lightest in design
- Maximum payload

CUSTOMIZATION

- Designed with customers' needs in mind
- Added features upon request

When it comes to your bottom line, these new J&L Lite Doubles meet that demand with an average weight of 10,600 lbs. The overall structural design with internal ring stiffeners and all air ride will ensure the longevity of your investment. Low center of gravity and wider wheel base will make for better handling and safer maneuverability. The ergonomic controls and wide steps make for day to day safe operations. All polished aluminum and low profile design gives you that California look you've been searching for.

So what are you waiting for? Contact your dealer today and let the new J&L Lite California Pneumatic Doubles be a part of your successful business.

SOLUTIONS-DRIVEN

INDUSTRY LEADERSHIP

ENDURING PERFORMANCE

J&L 560 LITE Doubles

Pneumatic California Doubles

VESSEL

- Polished aluminum vessel
- Low center of gravity with modern design and a wide base for a better ride and driver stability
- Engineered conical cone design for faster off load times
- Air pads offer efficient assistance for even quicker off load times
- All air ride suspension for overall smooth ride and durability of vessel and components
- Internal structural support to increase longevity and integrity

OPERATOR ERGONOMICS

- B.T.I. ultralight lids with manufacture warranty
